DETAILED ACTION

The application should be reviewed for errors. Error occurs, for example, in the spelling of "EdTA" at least in the claims.

To facilitate processing of papers at the U.S. Patent and Trademark Office, it is recommended that the Application Serial Number be inserted on every page of claims and/or of amendments filed.

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/1/07 has been entered.

Claims 1-4, 6-7, 16, 18 and 20-21 are being considered on the merits.

Claims 1-4, 6-7, 16, 18 and 20-21 are rejected under 35 U.S.C. § 112, first and second paragraphs, as the claimed invention is not described in such full, clear, concise and exact terms as to enable any person skilled in the art to make and use the same, and/or for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims 1, 16, 18, and 20 are missing the critical step of culturing or growing the bacterial cells in order to oxidize ammonia to nitrite in the process as claimed. It is submitted that merely providing or introducing cells fails to achieve the preamble of "alleviating or preventing the accumulation of ammonia" since no significant bioconversion is expected to occur solely by "introduction" or "provision".

Claim 16 is confusing in the recitation of "comprises a 16S rDNA" since the nature of this material is not clearly defined, even when interpreting the claim in light of the specification.

No claim is allowed.
